

Discontinuation of the FR Series Controllers and Setters (General-Purpose Inverter Options)

Thank you for your continued patronage of the Mitsubishi Electric drive control products. The functions of the FR series controllers and setters (general-purpose inverter options) are available in the ongoing models of our general-purpose inverters. Due to this, we are discontinuing the production of the products according to the following schedule. We ask for your understanding in this matter.

1. Models to be Discontinued

FR series controllers and setters (general-purpose inverter options) (7 models in total)

2. Schedule

- Production continues on orders received by the last day of April 2018.
- Repair service will be available on orders received by the last day of April 2025.

3. Target Models

Name	Model
DC tach. follower	FR-AL
Three speed selector	FR-AT
Preamplifier	FR-FA
Soft starter	FR-FC
Master controller	FR-FG
Remote speed setter	FR-FK
Speed detector	FR-FP

3. Succeeding Models

No succeeding model is available for the controllers or setters. Use applicable functions of the general-purpose inverter.

For details, refer to "Information for Replacement of FR Series Controllers and Setters (BCN-C21002-189(E))".
